

Protect your assets

nC Corrosion Passivator

Primer 2-in-1

For **dry** corroded surfaces.

Stop corrosion. Without blasting.

nC Corrosion Passivator Primer 2-in-1

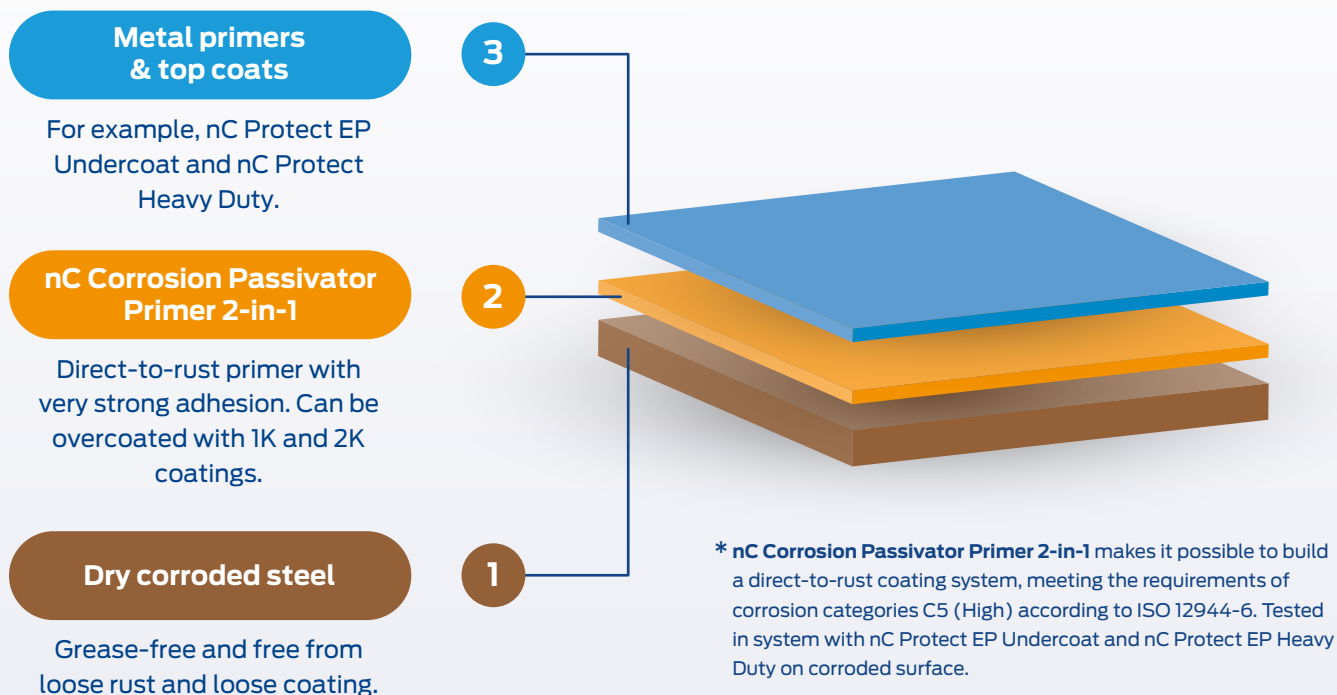

For **dry** corroded surfaces.

The **direct-to-rust primer** has been developed to stop corrosion without blasting. This reduces maintenance costs and downtime. It creates a chemically bonded protective layer beneath the coating system, resulting in long-lasting corrosion protection.

Applications:

- Protects steel on the deck, in tanks, in confined spaces, and on the hull.
- Protects against corrosion on pipelines up to 100°C.

- ✓ Minimal surface preparation; blasting not required.
- ✓ Chemical adhesion to the metal surface.
- ✓ Excellent tie-coat for 1K and 2K coatings.
- ✓ Recommended by professional shipping and maintenance teams.
- ✓ Meets ISO 12944-6 C5 (High) standard in system*.

Discover how you can save maintenance costs and downtime with nC Corrosion Passivator. Contact the team at Vidol Marine, distributor of nC Corrosion Passivator in the Netherlands, Belgium, and Germany.
